Thank You Letter

COU-SD-2003-11

9th June 2003

Dear Jim,

I would like to thank you and your team for the extensive time and effort you put into making us feel welcome at your facility. Our entire group was impressed by the technical knowledge and depth of understanding you and your team had for the safe disposal of nuclear waste. The knowledge and understanding you provided us will go a long way to allowing our Council to make an informed decision on the long-term storage and disposal of nuclear waste. We were especially impressed by the openness of yourself and your staff.

I also wonder if you could pass on a copy of this letter to your local civic leaders, who made us so welcome in your lovely community. The open and frank discussions that we had with them regarding nuclear waste and the economic development surrounding the industry was extremely interesting. They should be very proud of the relationship they have established with your facility, proving that we all can come to terms with the disposal of nuclear waste and prove that it can be made to be a “win win” situation for all concerned. It is through this type of progressive and responsible relationship, we can all move forward together.

Please let me extend a hand of friendship should you, members of your team or your civic leaders ever wish to visit our community, we would welcome that and perhaps we could show the same hospitality we received.

Once again Jim, please accept our gracious thanks for an excellent and educational tour.

Yours Faithfully,

?????? ???? ?

Councillor Sandy Donald.
