Press Release

Bruce Units 1 and 2.

PR-SRD-2004-01
29th January 2004

The Municipality of Kincardine is extremely pleased with the announcement by Bruce Power today.

We as a Municipality expect to be fully involved with a project of this magnitude and look forward to assisting our largest employer in going forward safely with the Condition Assessment of Bruce Units One and Two and the feasibility of future Nuclear Palnt builds.

If the safety and business case is made for the restart of these two units, we as a Municipality and I am sure our sister Municipalities, look forward in assisting Bruce Power to become more successful in this and it's other future endeavours, as by doing this, the area will be able to produce sustainable vibrant communities for future generations.

This is in my opinion, a win win situation for everyone in the area.

I believe this announcement is in keeping with the vision of this area becoming the powerhouse of Ontario, embracing all forms of safe, clean and renewable energy. We want to assist the Province in its campaign to produce new and alternative sources of energy and I am sure the people of Bruce County are up to the challenge in making it happen.

It once again proves, that good people and good ideas produce a great community.

Deputy Mayor Sandy Donald.
