Water Main Expansion Kincardine Avenue

PW-SRD-2004-02
14th December 2003

Dear Committee,

Could you please have the following item discussed at your next convenient Public Works Committee meeting?

Kincardine Avenue Water Main Expansion.

As we stand right now, I believe that the water main most South Easterly of Kincardine ends at the fire hydrant at the east end of Kincardine Avenue, close to Highway #21. I would like the Public works committee to discuss with a view to including in the 2004 budget, the extension of the water main under Highway #21 to a "T" valving north of the road just passed the cell tower.

This would put the Municipality in the position to supply both the North and South side of the Highway on the East side. It would allow connection and then development of the "Brigadoon" estates, which I believe would be of advantage to the town and its residents. It would also allow future development to take place directly along the Highway on the east side, from a commercial perspective.

At the same time, could we look into tie ins with the Superheat building on the West side of Highway #21.

The above should also become part of our strategic plan for the development of the South end of the town.

I appreciate you taking the time to include this in your agenda and look forward to your reply

Yours Faithfully,

Sandy Donald

Deputy Mayor Sandy Donald.
